

# SharePoint 2013

What does this course offer you?

This course will help you become familiar with the basic default functions of SharePoint 2013 and show you how to make good use of SharePoint 2013 in conjunction with Office in your day-to-day work.

You will learn about the most important items when working with SharePoint 2013 – workspaces, documents and lists. In addition, the work organisation in SharePoint 2013 will be examined in more detail. You will learn how to work with folders and Explorer in SharePoint 2013, and also about the advanced organisation of workspaces using metadata. The basic function of sorting, filtering and working with views will be covered extensively, as will checking in and out, versioning documents and the E-mail Alert function. In addition, you will learn how you can use task and calendar functions and meeting workspaces in SharePoint 2013 for effective collaboration.

The primary subject matter of the course:

## Basic information

- SharePoint introduction
